

Participant: Unknown
 Address: 123 Windy Road, Wayout, OR 97777
 Date: 1/5/2011

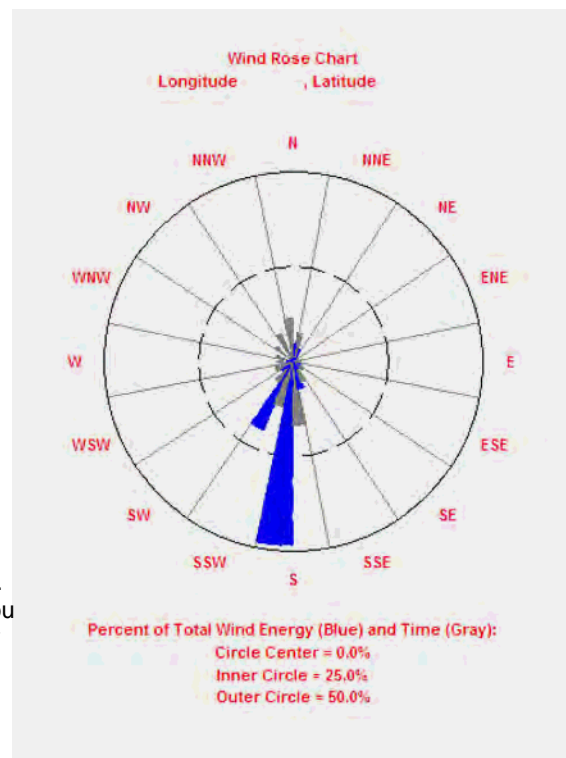

0 120 240 480 Meters

Site Attributes

Latitude: 4X°XX'XX.XX"N
 Longitude: 1XX°XX'XX.XX"W
 Wind Speed @ 30m:* 5.32 m/s
 Wind Speed @ 50m:* 5.81 m/s
 Elevation: 305 m

*Annual average wind speed at reported height

Thank you for your interest in Energy Trust of Oregon's Wind program. This Wind Resource Assessment was generated in response to your inquiry about the potential wind resource at your location. Many factors can influence the effectiveness of a wind energy system. Energy Trust is providing this Wind Resource Assessment to you based upon certain assumptions and available wind resource mapping information. From wind resource maps, you can usually determine whether an area of interest is a good candidate for further exploration. Actual wind speeds at this site may vary. Wind resources at micro-level can vary significantly, and site conditions can dramatically distort the speed and quality of the winds at this location, and may not be reflected in this assessment. Always consult a professional and proceed with due diligence if you are interested in installing or developing a wind energy project. For more information regarding wind energy systems and eligibility requirements visit: www.energytrust.org/smallwind
