	RHFE-1004FRA-N	38,400	80.6

Notes

Direct-Vent Gas Wall Furnaces	Self-contained heating appliances that draw in combustion air and discharge by-products through a vent to the outside. They are permanently attached to the structure of a building and are not connected to ductwork
AFUE	Annual Fuel Utilization Efficiency. A measure of a gas heater's efficiency in converting fuel to energy—the higher the rating, the more efficient the unit.

Measures and incentives subject to change after December 31, 2011.
Energy Trust welcomes contractors to join our Trade Ally Network.
