# 1 Executive Summary

---

## 1.1 Introduction

In July 1999, Senate Bill 1149 (SB 1149) was enacted to introduce competition into Oregon's electricity markets within the Portland General Electric (PGE) and PacifiCorp service territories.<sup>1</sup> As part of SB 1149, these utilities were required to collect a 3 percent charge on their retail electricity sales beginning in March 2002. This public purpose charge (PPC) is used to fund cost-effective energy conservation and the above-market costs of renewable energy resources and to help provide weatherization and other energy assistance to low-income households and public schools.

Oregon has a 30-year history of using ratepayer funding for conservation and renewable programs prior to SB 1149. Before 2002, utilities administered conservation programs using ratepayer funds. Under SB 1149, programs are still funded by ratepayers (through the public purpose charge) but responsibility for running these programs was transferred to Energy Trust of Oregon. The administrators of the various programs funded with the public purpose charge are:

- **Energy Trust of Oregon, Inc.** The non-profit Energy Trust began administering funds in March 2002 and seeks to develop and implement programs that promote energy conservation, lower the costs of renewable energy resource system installations and transform markets to efficient products and services in the service areas of Portland General Electric and PacifiCorp. Energy Trust receives 73.8 percent of the available public purpose charge funds; 56.7 percent is dedicated to conservation programs and 17.1 percent is dedicated for renewable energy projects.
- **School Districts.** Oregon has 112 school districts within PGE and PacifiCorp service territories. The districts collectively receive 10 percent of public purpose charge funds to improve energy efficiency in individual schools. Prior to June 2011, when HB 2960 was passed, these funds were distributed to 16 Educational Service Districts.
- **Oregon Housing and Community Services.** Oregon Housing and Community Services (OHCS) receives and administers public purpose charge funds for two low-income housing programs. Four and one-half percent of the public purpose charge funds are dedicated to low-income housing development projects in the PGE and PacifiCorp service areas; these projects involve construction of new housing or rehabilitation of existing housing for low-income families through the OHCS Housing Trust Fund. OHCS operates two weatherization programs, and an additional 11.7 percent of the total PPC funds collected are allocated for the weatherization of dwellings of low-income residents in the PGE and PacifiCorp service areas. One program provides home weatherization (for single- and multi-family, owner occupied, and rental housing) and

---

<sup>1</sup> SB 1149, which specifically addresses the public purpose charge, is codified in ORS 757.600, et. seq. ORS 757.612.

the other provides for weatherization of affordable multi-family rental housing through the OHCS Housing Division.

In addition to projects conducted by these agencies, large commercial and industrial customers can implement their own energy conservation or renewable energy projects. These “self-direct” customers can then deduct the cost of projects from the conservation and renewable resource development portion of their public purpose charge obligation to utilities.

In August 2014, Evergreen Economics was hired by the Oregon Department of Energy (ODOE) and the Oregon Public Utility Commission (OPUC) to prepare a report to the Oregon Legislature documenting PPC receipts and expenditures in compliance with ORS 757.617(1)(a). Specifically, Evergreen Economics

- Documented PPC disbursements to each agency by PGE and PacifiCorp;
- Demonstrated how each agency utilized funds;
- Summarized important project accomplishments; and
- Documented administrative costs using a common cost definition across agencies.

This report does not attempt to evaluate how well the various PPC programs are being implemented, nor have we attempted to independently verify the energy savings accomplishments reported by the PPC fund administrators. These issues are usually addressed through formal third-party program evaluations such as those currently being performed for the Energy Trust of Oregon programs.

## **1.2 Receipt and Exenditure Summary**

Table 1 shows PPC fund disbursements to the various administrators and programs for the January 1, 2013 – June 30, 2014 period. The far right column of the table lists the level of expenditure for these funds over the same period, and shows that expenditures were similar to disbursements for most programs. As shown at the bottom of the table, PPC expenditures totaled \$114,236,107 across all fund administrators. Administrative costs for agencies receiving the PPC funds totaled \$6,774,437, or 5.93 percent of all expenditures during this period.

**Table 1: PPC Disbursements and Expenditures (1/2013 - 6/2014)**

Fund Administrator / Program	Disbursement Source			Expenditure
	PGE	PacifiCorp	Total	Total
<b>Energy Trust of Oregon</b>				
Conservation	\$41,596,549	\$31,179,355	\$72,775,904	\$54,968,086
Renewable Energy	\$12,231,947	\$8,910,003	\$21,141,950	\$11,125,635
Administrative Expenses				\$5,785,446
<b>School Districts</b>	\$7,769,597	\$5,491,791	\$13,261,388	\$15,978,644
ODOE Program Expenses				\$340,013
Administrative Expenses				\$176,978
<b>Oregon Housing and Community Services</b>				
Low-Income Weatherization*	\$9,090,432	\$6,429,199	\$15,519,631	\$13,298,790
Low-Income Housing	\$3,496,320	\$2,472,844	\$5,969,164	\$5,740,518
Administrative Expenses				\$641,426
Evaluation, Training, Technical Assistance				\$353,575
Energy Education				\$1,168,388
<b>Self-Direct Customers**</b>				
Conservation	\$2,665,068	\$117,289	\$2,782,357	\$2,782,357
Renewable Energy	\$1,084,764	\$555,058	\$1,639,822	\$1,639,822
ODOE Program Expenses				\$65,842
Administrative Expenses				\$170,588
<b>Totals</b>	<b>\$77,934,677</b>	<b>\$55,155,539</b>	<b>\$133,090,216</b>	<b>\$114,236,107</b>
<b>Administrative Costs Only</b>				<b>\$6,774,437</b>

\* Low-Income Weatherization includes the ECHO program and the Low-Income Weatherization Program (for multi-family rental housing).

\*\* The amounts listed for Self-Direct represent public purpose charges retained and spent by the participating sites in lieu of making payments to the utilities.

Table 2 below summarizes the expenditures and results for PPC expenditures from January 2013 through June 2014. The agencies spent a combined total of \$114,236,107 on programs and projects completed during this period. Annual energy savings and renewable resource generation achieved from projects completed during this time reached 898,415,962 kWh (almost 103 aMW), which is enough to power approximately 79,500 average-sized homes each year.<sup>2</sup> When all fuel types are included in addition to electricity, PPC expenditures resulted in annual savings of 3,127,129 million Btu.

<sup>2</sup> Calculated using ODOE's estimate that an average megawatt is enough to power 775 homes each year (assuming electric heat).

**Table 2: Summary of PPC Expenditures and Results (1/2013 - 6/2014)**

Agency / Program	Expenditures	Results		
		kWh Saved or Generated	aMW	MMBtu
<b>Energy Trust – Conservation*</b>	\$59,775,805	317,296,789	36.22	1,082,617
<b>Energy Trust – Renewables**</b>	\$12,103,361	26,190,491	2.99	89,362
<b>School Districts***</b>	\$16,495,635	4,876,315	0.56	78,294
<b>OHCS Low-Income****</b>	\$21,202,697	8,143,166	0.93	27,786
<b>Self-Direct Customers*****</b>	\$4,658,609	541,909,201	61.86	1,849,071
<b>Total Expenditures</b>	<b>\$114,236,107</b>	<b>898,415,962</b>	<b>102.56</b>	<b>3,127,129</b>

\* Schools Projects savings of 36,237 kWh have been subtracted from Energy Trust – Conservation savings to prevent double counting, since both Energy Trust and the School Districts support this effort and therefore include the savings in their reports. Energy Trust delivers additional savings to PGE and PacifiCorp through funding authorized under SB 838, and to NW Natural and Cascade Natural Gas under the terms of a stipulation with the OPUC. Energy Trust reports total savings for all expenditures to the OPUC.

\*\* Energy saved excludes savings from reduced transmission and distribution losses. Renewable energy savings are from currently operational projects.

\*\*\*MMBtu includes savings from electricity, natural gas, and other fuels.

\*\*\*\* Expenditures for the OHCS Low-Income program include expenditures from the Housing Trust Fund, which does not track energy savings for its projects.

\*\*\*\*\* Expenditures listed for Self-Direct represent public purpose charges retained and spent by the participating sites in lieu of making payments to the utilities.

## 2 Public Purpose Charge (PPC) Overview

---

### 2.1 Introduction

In July 1999, Senate Bill 1149 (SB 1149) was enacted to introduce competition into Oregon's electricity markets within the Portland General Electric (PGE) and PacifiCorp service territories.<sup>3</sup> As part of SB 1149, these utilities were required to collect a 3 percent charge on their retail electricity sales beginning in March 2002. This public purpose charge (PPC) is used to fund cost-effective energy conservation and the above-market costs of renewable energy resources and to help provide weatherization and other energy assistance to low-income households and public schools.

In August 2014, Evergreen Economics was hired by the Oregon Department of Energy (ODOE) and the Oregon Public Utility Commission (OPUC) to prepare a report to the Oregon Legislature documenting PPC receipts and expenditures in compliance with ORS 757.617(1)(a). Specifically, Evergreen Economics

- Documented PPC disbursements to each agency by PGE and PacifiCorp;
- Demonstrated how each agency utilized funds;
- Summarized important project accomplishments; and
- Documented administration costs using a common cost definition across PPC administrators.

The remainder of this section provides an overview of the total PPC funds collected and disbursed from January 2013 through June 2014. Additional detail on how each organization utilized funds is provided in subsequent sections.

### 2.2 PPC Fund Distribution

The PPC funds are collected and distributed across several organizations for administration of energy conservation and renewable energy programs:

- **Energy Trust of Oregon, Inc.** The non-profit Energy Trust began administering funds in March 2002; Energy Trust seeks to develop and implement programs that promote energy conservation, lower the costs of renewable energy resource system installations and transform markets to efficient products and services within the service areas of PGE and PacifiCorp. Energy Trust receives 73.8 percent of the available PPC funds (56.7 percent dedicated to conservation programs and 17.1 percent for renewable energy projects).

---

<sup>3</sup> SB 1149 is codified in ORS 757.600, et. Seq. ORS 757.612 specifically addresses the public purpose charge.

- **School Districts.** Oregon has 112 school districts within PGE and PacifiCorp service territories. The districts collectively receive 10 percent of PPC funds to improve energy efficiency in individual schools. Prior to June 2011, when HB 2960 was passed, these funds were distributed to 16 Educational Service Districts.
- **Oregon Housing and Community Services.** Oregon Housing and Community Services (OHCS) receives and administers PPC funds for two low-income housing programs. Four and one-half percent of the PPC funds are dedicated to low-income housing development projects in the PGE and PacifiCorp service areas. These projects involve construction of new housing or rehabilitation of existing housing for low-income families through the OHCS Housing Trust Fund. OHCS operates two weatherization programs, and an additional 11.7 percent of the total PPC funds collected are allocated for the weatherization of dwellings of low-income residents in the PGE and PacifiCorp service areas. One program provides home weatherization (for single- and multi-family, owner occupied, and rental housing) and the other provides for weatherization of affordable multi-family rental housing through the OHCS Housing Division.

In addition to projects conducted by these agencies, large commercial and industrial customers can implement their own energy conservation or renewable energy projects. These “self-direct” customers can then deduct the cost of projects from the conservation and renewable resource development portion of their PPC obligation to utilities.

Figure 1 shows how total PPC funds were allocated across administrators from January 2013 through June 2014 (see Table 4 for detailed utilities disbursements).

**Figure 1: PPC Fund Allocation by Administrator and Program (1/2013 – 6/2014)<sup>4</sup>**

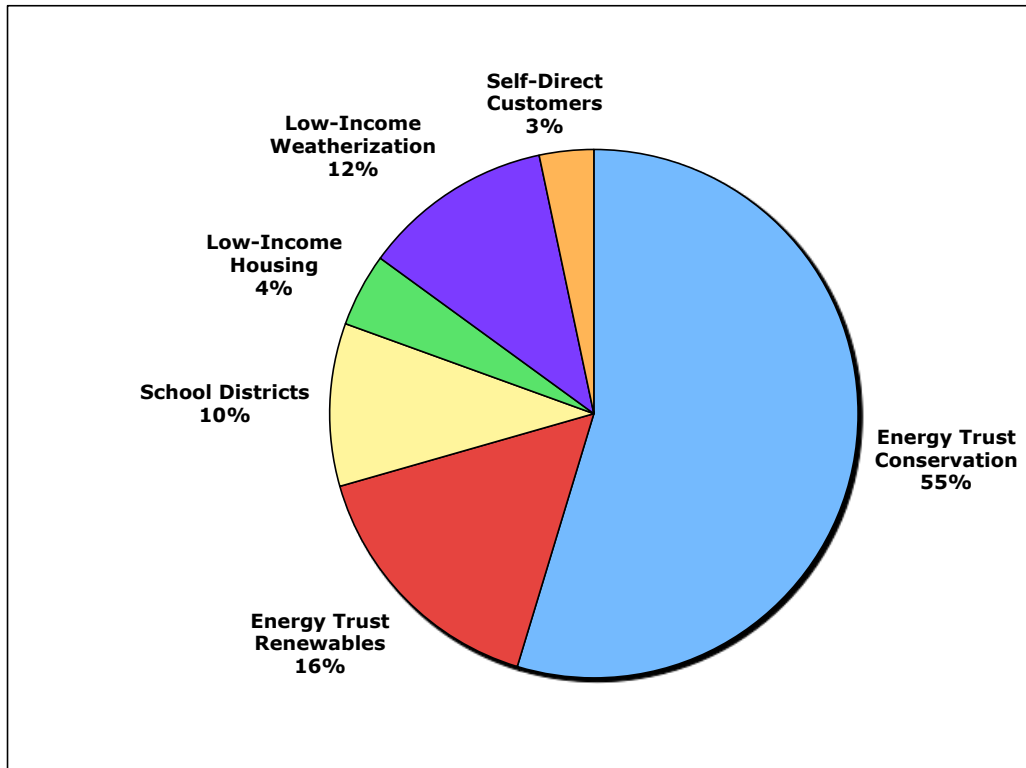

Figure 2 shows the total PPC fund collections for the January 2013 through June 2014 period divided between residential and non-residential ratepayers for each utility.<sup>5</sup> For both utilities, public purpose funds were collected in nearly identical proportions from the residential and non-residential sectors.

<sup>4</sup> This graph includes self-direct expenditures, and thus the allocation percentages do not match the PPC disbursements discussed previously, which pertain to total PPC funds *collected* by the utilities. This chart reflects the utilities' direct allocations to School Districts; Energy Trust provides additional funding for School Districts.

<sup>5</sup> The sector share was calculated by each utility based on revenues received from January 2013 through June 2014. Because of the seasonal nature of energy consumption, this distribution can vary from month to month.

**Figure 2: Sector Contribution of PPC Funds by Utility (1/2013 – 6/2014)**

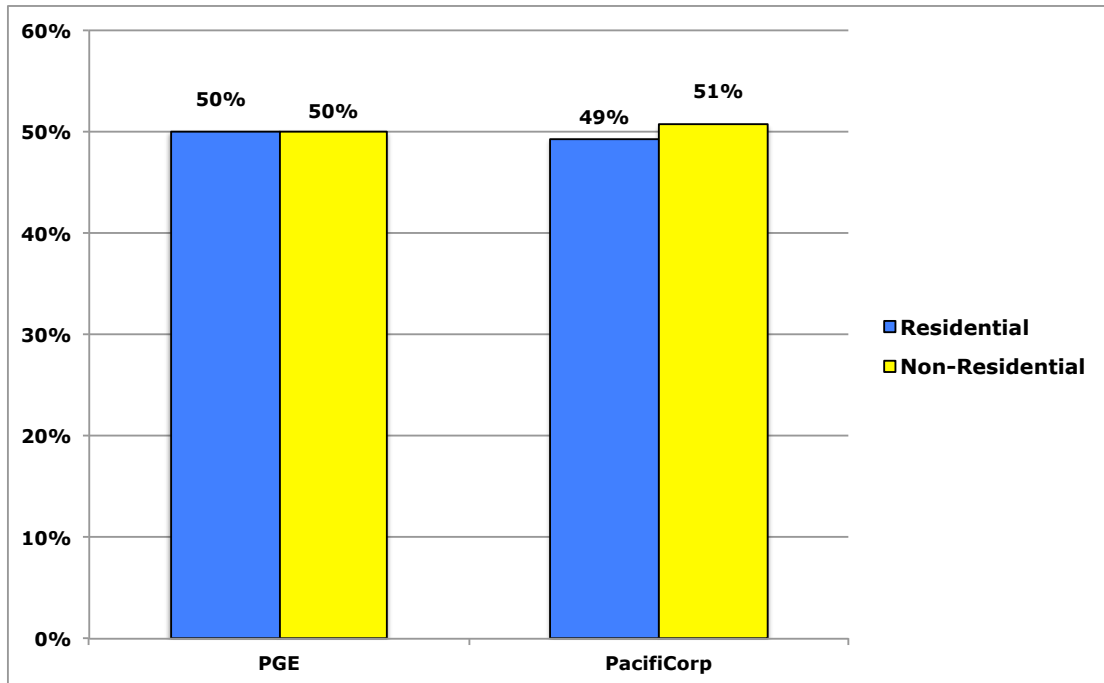

Figure 3 shows how PPC fund expenditures by the various agencies and programs were distributed among sectors. The non-residential sector (excluding schools) accounted for 43 percent of expenditures from January 2013 to June 2014. Over the same timeframe, schools accounted for 14 percent of expenditures, 11 percent of expenditures were spent on renewable resource development, and 32 percent of expenditures were spent on programs for residential customers (covered by the OHCS and Energy Trust residential conservation programs).<sup>6</sup>

<sup>6</sup> These schools expenditures are from the utilities' direct allocations only, and not additional funding from Energy Trust.

**Figure 3: PPC Expenditures by Sector (1/2013 – 6/2014)**

## 2.3 Receipt and Expenditure Summary

This report details public purpose charge expenditures from January 1, 2013 to June 30, 2014. Table 3 shows the total funds collected during this period from both PGE and PacifiCorp. Over this 18-month period, PGE disbursed \$77,934,677 in PPC funds and PacifiCorp disbursed \$55,155,539, for a total of \$133,090,216 allocated across the agencies. The utilities spent a combined total of \$122,938 on administrative expenses to collect and distribute PPC funds to the agencies. This amount includes funds distributed to the Oregon PUC to help administer the program.

**Table 3: Total PPC Fund Disbursements (1/2013 – 6/2014)**

Source	PPC Disbursements	Administrative Expenses*
PGE	\$77,934,677	\$66,216
PacifiCorp	\$55,155,539	\$56,722
<b>Total</b>	<b>\$133,090,216</b>	<b>\$122,938</b>

\*Includes fees paid to OPUC to help administer the PPC program.

Table 4 provides additional detail on the disbursement across the various programs for the January 2013 – June 2014 period. The far right column of the table lists the level of expenditure for these funds over the same period, and shows that expenditures were similar to disbursements for most programs. As shown at the bottom of the table, PPC expenditures

totaled \$114,236,107 across all fund administrators. Administrative costs for agencies receiving the PPC funds totaled \$6,774,437 or 5.93 percent of all expenditures during this period.

**Table 4: PPC Disbursements and Expenditures (1/2013 – 6/2014)**

Fund Administrator / Program	Disbursement Source			Expenditure
	PGE	PacifiCorp	Total	Total
<b>Energy Trust of Oregon</b>				
Conservation	\$41,596,549	\$31,179,355	\$72,775,904	\$54,968,086
Renewable Energy	\$12,231,947	\$8,910,003	\$21,141,950	\$11,125,635
Administrative Expenses				\$5,785,446
<b>School Districts</b>	\$7,769,597	\$5,491,791	\$13,261,388	\$15,978,644
ODOE Program Expenses				\$340,013
Administrative Expenses				\$176,978
<b>Oregon Housing and Community Services</b>				
Low-Income Weatherization*	\$9,090,432	\$6,429,199	\$15,519,631	\$13,298,790
Low-Income Housing	\$3,496,320	\$2,472,844	\$5,969,164	\$5,740,518
Administrative Expenses				\$641,426
Evaluation, Training, Technical Assistance				\$353,575
Energy Education				\$1,168,388
<b>Self-Direct Customers**</b>				
Conservation	\$2,665,068	\$117,289	\$2,782,357	\$2,782,357
Renewable Energy	\$1,084,764	\$555,058	\$1,639,822	\$1,639,822
ODOE Program Expenses				\$65,842
Administrative Expenses				\$170,588
<b>Totals</b>	<b>\$77,934,677</b>	<b>\$55,155,539</b>	<b>\$133,090,216</b>	<b>\$114,236,107</b>
<b>Administrative Costs Only</b>				<b>\$6,774,437</b>

\* Low-Income Weatherization includes the ECHO program and the Low-Income Weatherization Program (for multi-family rental housing).

\*\* The amounts listed for Self-Direct represent public purpose charges retained and spent by the participating sites in lieu of making payments to the utilities.

Table 5 shows the timing of PPC receipts and expenditures since 2012 for each agency. Unexpended funds from 2012 are listed, in addition to new receipts and expenditures during the January 2013 – June 2014 period.<sup>7</sup>

<sup>7</sup> The SB 1149 Schools Program operates on a reimbursement model. School districts pay for eligible projects with other funds such as bonds, and then are reimbursed from their SB1149 funds. Reimbursement could consist of a single payment if a district's SB1149 balance is large enough, or it may include multiple payments as additional PPC funds are disbursed. Total reimbursement is capped at projected total disbursement through the end of 2025. A negative carry forward amount indicates that a portion of the total cost of all installed measures will be reimbursed from future PPC disbursements.

**Table 5: Cumulative PPC Receipts and Expenditures (1/2013 – 6/2014)**

<b>Fund Administrator / Program</b>	<b>2012 Carry Forward*</b>	<b>1/2013 - 6/2014 Receipts</b>	<b>1/2013 - 6/2014 Expenditures</b>
<b>Energy Trust of Oregon</b>			
Conservation	\$782,503	\$72,775,904	\$59,775,805
Renewable Energy**	\$15,672,997	\$21,141,950	\$12,103,361
<b>School Districts</b>	-\$4,336,570	\$13,261,388	\$16,495,635
<b>Oregon Housing and Community Services***</b>	\$12,157,996	\$21,488,795	\$21,202,697
<b>Self-Direct Customers****</b>	\$0	\$4,422,179	\$4,658,609
<b>Totals</b>	<b>\$24,276,926</b>	<b>\$133,090,216</b>	<b>\$114,236,107</b>

\* 2012 carryover amounts calculated by Evergreen Economics using data from the *Report to Legislative Assembly on Public Purpose Expenditures for the Period January 1, 2011 – December 31, 2012* (March 29, 2013).

\*\* Renewables carryover includes uncommitted funds and funds committed to project installations in future years.

\*\*\* Expenditures for the OHCS Low-Income program include expenditures from the Housing Trust Fund.

\*\*\*\* The amounts listed for Self-Direct represent public purpose charges retained and spent by the participating sites in lieu of making payments to the utilities.

The remaining sections in this report describe how each organization used its allocated funds. For comparison's sake, administrative expenses have been consistently defined as

1. Costs that cannot be otherwise associated with a certain program but which support an agency's general operations. These costs may include board or executive director activities, general business management, accounting, general reporting, and oversight;
2. General outreach and communication; and
3. The following direct program support costs:
  - a. Supplies
  - b. Postage and shipping
  - c. Telephone
  - d. Occupancy expenses
  - e. Printing and publications
  - f. Insurance
  - g. Equipment
  - h. Travel
  - i. Meetings, training, and conferences
  - j. Interest expense and bank fees
  - k. Depreciation and amortization
  - l. Dues, licenses, and fees
  - m. Other misc. expenses

The administrative expenses provided for each agency all conform with this definition.

## 3 Energy Trust of Oregon, Inc.

### 3.1 Overview

The Oregon PUC designated Energy Trust of Oregon, Inc. to administer the conservation and renewable resource and market transformation components of the PPC. Energy Trust sponsors a suite of programs that target new and existing residential, commercial, and industrial electricity customers in the PGE and PacifiCorp service areas. Through these programs, Energy Trust provides informational assistance and financial incentives to install efficiency measures and lower costs of projects that generate electricity using renewable energy resources. A portion of the funds from Energy Trust is also allocated to the Northwest Energy Efficiency Alliance (NEEA) to support its ongoing energy efficiency market transformation programs.<sup>8</sup>

Table 6 provides a summary of Energy Trust PPC revenues and expenditures from January 1, 2013 through June 30, 2014. Funds received by Energy Trust during this period totaled \$93,917,854 and expenditures totaled \$71,879,166. Administrative expenses totaled \$5,785,446 and comprised 8.0 percent of total spending by Energy Trust on electric conservation and renewable programs and 6.2 percent of total PPC receipts during this period.<sup>9</sup>

**Table 6: Energy Trust Receipt and Expenditure Summary (1/2013 – 6/2014)**

Transaction	PGE	PacifiCorp	Total
<b>Total Fund Receipts</b>	<b>\$53,828,496</b>	<b>\$40,089,358</b>	<b>\$93,917,854</b>
<b>Expenditures</b>			
Energy Conservation	\$31,908,712	\$23,059,374	\$54,968,086
Renewable Energy	\$6,429,915	\$4,695,720	\$11,125,635
Administrative Expenses	\$3,472,412	\$2,313,034	\$5,785,446
<b>Total Expenditures</b>	<b>\$41,811,039</b>	<b>\$30,068,127</b>	<b>\$71,879,166</b>

<sup>8</sup> Energy Trust also administers residential, commercial, and industrial conservation programs for Northwest Natural Gas Company and Cascade Natural Gas Corporation under the terms of a stipulation with the OPUC. Avista Utilities also contracted with Energy Trust in 2006 and 2007 to deliver three programs in its service territory. In 2008, PGE and Pacific Power began providing additional funds for achievable cost-effective energy efficiency to Energy Trust pursuant to section 46 of the 2007 Renewable Energy Act (SB 838).

<sup>9</sup> Administrative expenses used here and in subsequent tables are defined using the common administrative expense definition discussed in section 2.3 of this report (Receipt and Expenditure Summary) and are for program delivery services funded through SB 1149 only. Administrative costs allocated to Northwest Natural Gas, Cascade Natural Gas, and to PGE and PacifiCorp as authorized under SB 838, are not included here.

## 3.2 Energy Conservation

### 3.2.1 Receipts and Expenditures

Table 7 shows Energy Trust fund receipts and expenditures for its conservation programs. During the January 1, 2013 through June 30, 2014 period, \$72,775,904 in PPC funds was distributed to Energy Trust for spending on these programs. Conservation expenditures totaled \$59,775,805 during this same period. Administrative costs that could be directly assigned to Energy Trust conservation programs totaled \$4,807,720, or 8.0 percent of total conservation program spending and 6.6 percent of total PPC receipts for conservation programs.

**Table 7: Energy Trust Conservation Receipts and Expenditures (1/2013 – 6/2014)**

Transaction	PGE	PacifiCorp	Total
<b>Fund Receipts</b>	<b>\$41,596,549</b>	<b>\$31,179,355</b>	<b>\$72,775,904</b>
<b>Expenditures</b>			
Program Expenditures	31,908,712	23,059,374	54,968,086
Administrative Expenses	2,914,849	1,892,871	4,807,720
<b>Total Expenditures</b>	<b>\$34,823,560</b>	<b>\$24,952,245</b>	<b>\$59,775,805</b>

### 3.2.2 Results<sup>10</sup>

Energy Trust conservation activities consisted of the design and delivery of conservation programs targeted to different market sectors with a wide range of energy saving measures. Table 8 shows the accomplishments of the individual programs sponsored by Energy Trust. During the period covered by this report, 317,333,026 kWh in energy savings were achieved across all market sectors. The industrial sector accounted for 46 percent of these savings with 147,027,700 kWh saved. Commercial sector savings were 110,780,846 kWh (35 percent of Energy Trust conservation savings), and residential sector savings were 59,524,480 kWh (19 percent).

The Production Efficiency Program accounted for 98 percent of savings in the industrial sector. In the commercial sector, the New Building Efficiency Program was the largest contributor and accounted for 52 percent of the energy savings achieved in this sector followed by the Building Efficiency Program, which accounted for an additional 38 percent.

<sup>10</sup> Energy Trust delivers additional savings to PGE and PacifiCorp through funding authorized under SB 838, and to Northwest Natural Gas and Cascade Natural Gas under the terms of a stipulation with the OPUC. Energy Trust reports total savings for all expenditures to the OPUC.

**Table 8: Energy Trust Conservation Programs Energy Savings By Utility (1/2013 – 6/2014)\***

Program Name	PGE Savings (kWh)	PacifiCorp Savings (kWh)	Total Savings (kWh)	Average Life of Savings (years)
<b>Residential</b>				
Home Energy Savings	7,019,753	7,196,930	14,216,683	13.1
New Homes & Products	12,058,092	11,380,827	23,438,919	9.2
NEEA (Market Transformation)	12,902,550	8,966,328	21,868,878	8.0

\* Savings from reduced transmission and distribution losses are not counted in this table.

\*\*Savings include 36,237 kWh for Schools projects that utilized ODOE-managed SB 1149 funds and received Energy Trust program support to identify electric and natural gas conservation opportunities. Of this amount 19,626 kWh were saved in PGE territory 16,611 kWh were saved in Pacific Power territory. The savings reported by Energy Trust will not match ODOE-reported Schools savings figures due to: a) differences in when each organization recognizes project completion for reporting purposes b) evaluation factors applied by Energy Trust that can reduce or increase savings reported for installed measures and c) Schools projects occurring outside Energy Trust territory. Key projects completed to date with program support from Energy Trust include custom lighting and custom controls projects at North Powellhurst Elementary School, an insulation project at Umatilla High School, a custom HVAC project at Centennial High School, and a custom lighting project at Lynch View Elementary School. In coordination with ODOE, Energy Trust provides energy audits and savings analysis to schools seeking to leverage their SB 1149 public purpose funds for energy efficiency projects. Energy Trust reached out to 22 school districts and worked with 17 of these school districts to perform studies for 51 schools from January 2013 through June 2014.

Table 9 provides additional detail regarding the types of efficiency improvements that are being implemented for the various conservation programs. In the residential sector, at least 7,317 ENERGY STAR appliances received rebates, and in the commercial sector, 925 existing buildings and 756 multifamily buildings were retrofitted.

**Table 9: Energy Trust Example Efficiency Improvements (1/2013 - 6/2014)**

Improvement Type	Number of Projects*	Average Life of Savings (Years)
<b>Commercial projects</b>		
Existing buildings retrofitted	925	13.7
Efficient new buildings constructed	189	13.7
Multifamily buildings retrofitted	756	12.7
New multifamily buildings constructed	59	12.2
Solar water heating commercial installations	4	20.0
<b>Industrial projects</b>		
Efficient manufacturing processes, water and wastewater treatment, and agriculture	732	11.8
<b>Residential projects</b>		
Efficient new homes constructed	629	31.0
Efficient new manufactured homes purchased	44	29.9
Home energy reviews conducted	840	N/A
Single-family homes retrofitted	777	15.9
Manufactured homes retrofitted	528	15.8
Residential solar water heating installations	7	20
ENERGY STAR appliance rebates	7,317	13 to 22**

\*Number of projects is not the same as number of measures. Multiple measures are often installed for individual projects.

\*\* Dishwashers: 13 years, Clothes Washers: 14 years, Freezers: 20 years, Refrigerators: 22 years

Table 10 shows Energy Trust's cost for each conservation program and the levelized energy costs that have been achieved. The most Energy Trust funds were spent on the Industrial Production Efficiency Program (\$19.7 million) followed by the Commercial Building Efficiency Program (\$14.8 million) and the Commercial New Building Efficiency Program (\$6.7 million). The industrial sector attained the lowest overall levelized energy cost, with an average cost of 1.6 cents per kWh. The residential and commercial sectors had higher average levelized costs at 3.1 and 2.1 cents per kWh, respectively.

**Table 10: Energy Trust Conservation Costs and Levelized Energy Costs (1/2013 – 6/2014)**

Program Name	Energy Trust Cost (all electric funders)*	Levelized Cost (dollars/kWh)**
<b>Residential</b>		
Home Energy Savings	\$5,316,814	0.036
Efficient New Homes/Products	\$6,414,852	0.035
NEEA (Market Transformation)	\$3,500,645	0.023
<b>Total Residential</b>	<b>\$15,232,311</b>	<b>0.031</b>
<b>Commercial</b>		
Building Efficiency	\$14,764,993	0.037
New Building Efficiency	\$6,688,286	0.011
NEEA (Market Transformation)	\$2,378,067	0.020
<b>Total Commercial</b>	<b>\$23,831,346</b>	<b>0.021</b>
<b>Industrial</b>		
Production Efficiency	\$19,704,475	0.015
NEEA (Market Transformation)	\$1,007,673	0.034
<b>Total Industrial</b>	<b>\$20,712,148</b>	<b>0.016</b>

\* Energy Trust Cost includes allocated administrative costs. See footnote 9.

\*\* Levelized costs were calculated by Energy Trust and include savings for reduced transmission and distribution losses

Table 11 shows how the energy efficiency incentives paid by Energy Trust were distributed across the geographic regions of Oregon. About 64 percent of all incentives (\$17.6 million) were paid to customers in the Portland area, and 27 percent was divided between the Willamette Valley and Southern Oregon. The commercial sector received the largest share of incentive payments at 40 percent.

**Table 11: Energy Trust Energy Efficiency Incentive Payments by Sector and Region, Thousands of Dollars (1/2013 – 6/2014)**

Sector	Central/ East	NW/ Coast	Portland Area	Southern	Willamette Valley	Total
Commercial	\$993	\$102	\$7,875	\$1,161	\$1,040	<b>\$11,172</b>
Industrial	\$686	\$18	\$7,057	\$1,172	\$1,917	<b>\$10,850</b>
Residential	\$547	\$99	\$2,703	\$1,268	\$984	<b>\$5,601</b>
<b>Total</b>	<b>\$2,226</b>	<b>\$219</b>	<b>\$17,636</b>	<b>\$3,601</b>	<b>\$3,941</b>	<b>\$27,623</b>

### 3.3 Market Transformation

#### 3.3.1 Actions and Processes

NEEA is funded by electric utilities in Oregon, Washington, Idaho, and Montana, and Energy Trust provides funding on behalf of PGE and PacifiCorp’s ratepayers. NEEA helps promote electric efficiency through market transformation, i.e., change in sales, selection, design, installation, operation, and maintenance practices for homes, equipment, buildings and industrial facilities. NEEA’s programs are closely integrated with those of Energy Trust but are more focused on long-term market change. Among its current initiatives are programs for ductless heat pumps, heat pump water heaters, luminaire-level lighting controls, efficient consumer electronics (including TVs), existing building renewal, Strategic Energy Management (SEM) and efficient residential home construction.

#### 3.3.2 Participating Firms and Organizations

Through NEEA, Energy Trust’s efforts are coordinated with those of all the electric utilities of the Northwest (for activities beyond the PGE and PacifiCorp Oregon service territories) and the state energy offices and public utility commissions of Oregon, Montana, Idaho and Washington. NEEA also helps coordinate some program efforts with the Federal Government, for example, by negotiating with the US Environmental Protection Agency (EPA) to create the Northwest ENERGY STAR new home efficiency program. Through the Consortium for Energy Efficiency, Energy Trust and NEEA also coordinate with similar programs nationally.

Table 12 shows Energy Trust’s cost for each market transformation program. Total Energy Trust costs for market transformation were \$6.9 million, with the greatest share (51 percent) spent in the residential sector.

**Table 12: Energy Trust Market Transformation Costs (1/2013 - 6/2014)**

Program Name	Energy Trust Cost
NEEA Commercial	\$2,378,067
NEEA Industrial	\$1,007,673
NEEA Residential	\$3,500,645
<b>Total</b>	<b>\$6,886,385</b>

Table 13 shows the energy savings accomplishments of the programs delivered by NEEA. During the period covered by this report, over 36,000,000 kWh in energy savings were achieved across the three market sectors, with the residential sector accounting for 60 percent of the savings.

**Table 13: Market Transformation Energy Savings By Program and Utility (1/2013 – 6/2014)\***

Program Name	PGE Savings (kWh)	PacifiCorp Savings (kWh)	Total Savings (kWh)	Average Life of Savings (years)
NEEA Residential	12,902,550	8,966,328	21,868,878	8.0
NEEA Commercial	6,353,915	4,415,488	10,769,403	15.0
NEEA Industrial	2,149,313	1,493,575	3,642,887	10.0
<b>Total</b>	<b>21,405,778</b>	<b>14,875,391</b>	<b>36,281,168</b>	<b>10.3</b>

\* Savings from reduced transmission and distribution losses are not counted in this table.

### 3.3.3 Technology Advancement

This section provides some examples of the many projects that NEEA is undertaking to validate, refine, and introduce new potentially cost-effective technologies to Northwest markets.

Beginning in 2012, NEEA worked with technical building experts to create a draft Next Step Home specification, which will include a set of advanced energy-efficient building practices and technologies to help accelerate residential new construction code changes. NEEA tested the specification in 2013 to demonstrate builders' ability to meet these advanced building practices and test the performance of pilot homes. After making final refinements to the specification's mix of practices and products, NEEA's emerging Initiative will result in new homes that are approximately 30 percent more efficient than those complying with current state building codes.

In addition, NEEA's continuous energy monitoring in the Next Step Home pilots revealed that ductless heat pumps (DHPs) cycled on and off frequently, wasting energy, increasing energy costs and reducing equipment life. NEEA shared the findings and worked with manufacturers to optimize product energy efficiency and production. Based on NEEA's research, new firmware could deliver an additional 300 to 500 kWh of annual savings from each system, and one major manufacturer has already implemented a global, product-wide firmware upgrade to increase energy savings. NEEA will be working with the Air Conditioning, Heating & Refrigeration Institute to design a test procedure that will reflect real-world conditions encountered in the monitoring project.<sup>11</sup>

In the commercial lighting controls market, NEEA is helping to develop a new generation of products - Luminaire Level Lighting Controls (LLLC) - that may be able to deliver high energy savings for the Northwest using micro-zone sensing and control. NEEA's LLLC initiative develops tiered specifications to serve as a roadmap for the lighting industry and conducts functional testing to validate LLLC product performance. In 2011, NEEA partnered with Enlighted, Inc. to install and study its system at three Northwest sites. The study, completed

<sup>11</sup> NEEA 2013 Annual Report.

and released in 2013, showed the system delivered 42 percent aggregate energy savings and, in some cases, 60 to 70 percent savings. The product is the first to meet NEEA's LLLC specification. NEEA's findings will further boost market confidence in this new technology, which has more than 20 million square feet of installed space. NEEA will also use its research to develop a strategy to increase market adoption of this emerging technology.<sup>12</sup>

### 3.4 Renewable Energy

#### 3.4.1 Receipts and Expenditures

Table 14 shows the PPC fund receipts and expenditures dedicated to Energy Trust renewable energy programs from January 1, 2013 through June 30, 2014. During this period, \$21,141,950 in PPC funds was allocated to Energy Trust for renewable energy projects, and renewable energy program spending totaled \$12,103,361. Administrative costs related to the renewable energy program totaled \$977,726 and comprised 8.1 percent of total renewable energy program spending by Energy Trust and 4.6 percent of the PPC receipts designated for the renewable energy programs.

**Table 14: Energy Trust Receipts and Renewable Expenditures (1/2013 – 6/2014)**

Transaction	PGE	PacifiCorp	Total
<b>Fund Receipts*</b>	<b>\$12,231,947</b>	<b>\$8,910,003</b>	<b>\$21,141,950</b>
<b>Expenditures</b>			
Program Expenditures	6,429,915	4,695,720	11,125,635
Administrative Expenses	557,563	420,163	977,726
<b>Total Expenditures</b>	<b>6,987,478</b>	<b>5,115,883</b>	<b>12,103,361</b>

\* Unspent funds are carried over into future years either as uncommitted funds or funds committed to contracted project installations in future years. No incentive payments are made to contracted projects until projects have achieved operational status.

#### 3.4.2 Results

Table 15 lists all the active renewable energy generation projects funded by Energy Trust from January 2013 through June 2014. The largest amount of renewable energy capacity was achieved through a 1.4 MW above ground continuous flow stirred-tank reactor (CSTR) in Lane County. This biopower project digests 25 tons of post-consumer food waste from Portland, and other high strength food waste from the Willamette Valley. Another biopower project, an in ground plug flow digester for dairy cow waste in Tillamook County, achieved 0.75 MW. Furthermore, three (3) wind projects were completed in Marion, Polk, and Washington counties, with a capacity of 0.01 MW each.

Upon completion, all of the projects listed will provide a total of 56,896 MWh in renewable energy per year. Projects that are currently operational are providing 26,093 MWh per year. The Solar Electric Program, which provides homeowners and businesses with financial

<sup>12</sup> Ibid.

incentives to adopt power applications, has completed 1,342 projects that are now operational, and included in the above energy.

Table 16 shows all of the feasibility studies and other development projects that were approved for funding by Energy Trust's renewable energy programs from January 2013 through June 2014. A total of 37 projects were active during the report period: 27 were completed and 10 are ongoing. Project types range from proposal development, feasibility studies, and grant writing assistance to wind monitoring equipment.

**Table 15: Energy Trust Renewable Energy Projects Summary (1/2013 – 6/2014)**

Project	# of Projects	Status	Year	County	Estimated Life Years	Generating Capacity (MW)	Annual Energy (MWh/yr)	Project Cost (\$/MWh)	Cost to Energy Trust (\$/MWh)	Percent of Above Market Cost Paid	Utility Service Territory

## 4 Oregon Housing and Community Services

---

### 4.1 Overview

Oregon Housing and Community Services (OHCS) receives and administers PPC funds for low-income housing programs. Four and one-half percent of the PPC funds are dedicated to low-income housing development projects, either for construction of new housing or rehabilitation of existing housing for low-income families through the OHCS Housing Trust Fund. OHCS operates two weatherization programs, and an additional 11.7 percent of the total PPC funds collected are allocated for low-income weatherization. One program provides home weatherization (for single- and multi-family, owner occupied, and rental housing) and the other provides for weatherization of affordable multi-family rental housing. In either case, housing projects supported by PPC funds for weatherization are required to have a conservation element.

Table 17 provides a summary of the Trust Fund and Weatherization portion of PPC fund receipts and expenditures from January 1, 2013 through June 30, 2014. Funds received by Oregon Housing and Community Services during this period amounted to \$21,488,795 and expenditures including commitments totaled \$26,818,390. Administrative expenses comprised 3.5 percent of total spending between the three programs during this period.

**Table 17: OHCS Receipt and Expenditure Summary (1/2013 – 6/2014)**

Transaction	PGE	PacifiCorp	Total
<b>Receipts</b>			
<b>Low-Income Weatherization</b>			
Administration	454,522	321,460	775,982
Evaluation, Training, and Technical Assistance	454,522	321,460	775,982

<b>Total Expenditures (w/o Committed)**</b>	<b>8,914,951</b>	<b>5,552,226</b>	<b>21,202,697</b>
<b>Total Expended and Committed**</b>	<b>11,155,124</b>	<b>7,360,552</b>	<b>26,818,390</b>

\*Includes the ECHO program and the Low-Income Weatherization Program (for multi-family rental housing).

\*\* Low-Income Housing, Administrative, and Evaluation Training and Technical Assistance expenditures are not tracked by utility.

Specific detail on the low-income housing program and low-income weatherization activities is provided subsequently.

## 4.2 Low-Income Housing

### 4.2.1 Receipts and Expenditures

The Housing Development Grant Program (HDGP), commonly known as the Housing Trust Fund, was created in 1991 to expand the State’s supply of housing for low and very low-income families and individuals. The program provides grants and loans to construct new housing or to acquire and/or rehabilitate existing structures. Seventy-five percent of program funds must develop affordable housing to support households whose gross income is at or below 50 percent of the area median income (AMI); the balance of the funds can develop affordable housing to support households with incomes up to 80 percent of the area median income. The majority of program resources are awarded through a competitive application process that occurs twice annually, once for the spring and once for the fall funding cycle. Funding preference is given to project applicants who provide services appropriate for the targeted tenant population.

Table 18 shows PPC fund receipts and expenditures for the low-income housing program. During the January 2013 – June 2014 period, a total of \$5,969,164 in PPC funds were allocated to Oregon Housing and Community Services to support low-income housing projects throughout the State. Expenditures from PPC revenue for projects developed during this period were \$5,740,518. Funds to pay project costs totaling \$1,526,271 obligated but not spent as of June 30, 2014.

**Table 18: Low-Income Housing Program Receipts and Expenditures  
(1/2013 – 6/2014)**

Transaction	Total
<b>Fund Receipts</b>	<b>\$5,969,164</b>
<b>Expenditures</b>	
Committed but unexpended	\$1,526,271
Expenditures	\$5,740,518
<b>Total Expended and Committed</b>	<b>\$7,266,789</b>

### 4.2.2 Results

During the January 2013 – June 2014 period 45 housing units in Lane County were fully funded with PPC revenue that targeted families at or below 60 percent of Oregon’s median income. In prior years, OHCS granted funds to partners prior to the receipt of resources, based on projections. In 2012, the decision was made to cease forward allocation of resources to the low-income housing program. As a result, fewer dollars were available during this reporting period, and fewer projects were allocated funding. In future years, OHCS will continue to grant funds as they are received and will return to typical unit production.

## 4.3 Low-Income Weatherization (Multi-Family Rental Housing)

### 4.3.1 Receipts and Expenditures

The Low-Income Weatherization program is designed to reduce the energy usage and utility costs of lower income tenants residing in affordable rental housing. The program provides grant funding for the construction or rehabilitation of affordable rental housing that is located in PGE or PacifiCorp service territories. Use of these funds requires that at least 50 percent of the units in the project be rented to households whose income is at or below 60 percent of the area median income (adjusted by family size) as defined by HUD. Projects receiving funds must also remain affordable for at least 10 years.

For each dollar invested, the project must demonstrate at least one kilowatt-hour in energy savings in the first year of operation. Program resources may be used for shell measures such as windows, doors, and insulation as well as energy efficient appliances and lighting.

Table 19 shows the PPC fund receipts and expenditures allocated for low-income home weatherization. During this period, a total of \$2,251,655 in PPC funds was allocated to Oregon Housing and Community Services to support weatherization of rental housing projects within the State. Actual project expenditures were \$1,470,198 during this period while funds committed to projects totaled an additional \$567,427. Expenditures can be less than committed funds as housing development projects can take upwards of two years to complete and funds therefore need to be reserved over multiple years.

**Table 19: Low-Income Weatherization (Multi-Family Rental Housing)  
Receipts and Expenditures (1/2013 – 6/2014)**

Transaction	PGE	PacifiCorp	Total
<b>Fund Receipts</b>	1,319,076	932,579	2,251,655
<b>Expenditures</b>			
Committed but unexpended	410,529	156,898	567,427
Expenditures*	1,038,928	431,270	1,470,198
<b>Total Expended and Committed</b>	<b>1,449,457</b>	<b>588,168</b>	<b>2,037,625</b>

\*Includes expenditures for all projects regardless of funding year.

### 4.3.2 Results

The low-income weatherization accomplishments are summarized in Table 20. These six completed projects are expected to produce over 758,000 kWh in electricity savings in their first year of operation.

**Table 20: Low-Income Weatherization (Multi-Family Rental Housing) Accomplishments  
(1/2013 – 6/2014)**

Accomplishment	Total
<b>Number of Projects*</b>	<b>6</b>
<b>Number of Housing Units</b>	<b>398</b>
<b>Estimated Annual kWh Savings</b>	<b>758,519</b>
<b>Population Served (# of housing units)**</b>	
Elderly	156
Families	198
<b>Special Needs (# of housing units)</b>	
Special Needs Groups	0
Farm Workers	0
Units where household income is between 61 and 80 percent of the area median income	0
Units where household income is between 51 and 60 percent of the area median income	240
Units where household income is between 41 and 50 percent of the area median income	146
Units where household income is between 31 and 40 percent of the area median income	5
Units where household income is equal or less than 30 percent of the area median income	7

\* In this reporting period, these six projects accounted for \$731,019 in expenditures.

\*\*The subtotal of population served, 354, is less than the number of housing units 398. The remaining 44 housing units are housing units serving other Low-Income segments.

**Table 21** shows how the low-income weatherization projects were distributed among Oregon's counties.

**Table 21: Low-Income Weatherization Program by County (1/2013 – 6/2014)**

County	Number of Projects	Number of Units in County

Marion	1	108
Multnomah	2	104
Washington	1	57
Benton	1	35
<b>5 counties</b>	<b>6 Projects</b>	<b>398 Units</b>

## 4.4 Low-Income Weatherization (ECHO)

### 4.4.1 Receipts and Expenditures

A portion of the PPC allocated to Oregon Housing and Community Services goes into the Energy Conservation Helping Oregonians (ECHO) fund and is used for weatherization projects for low-income households.

Oregon Housing and Community Services (OHCS) contracts with local community action agencies (CAAs) to deliver the program. This local network of sub-grantees determines applicant eligibility and delivers services. Qualifying households must apply through the local CAA and are placed on a weatherization waiting list. The waiting period varies with each local agency depending on local need, but households with senior and disabled members and households with children under six years of age are given priority. Once a home is scheduled for weatherization, the applicant is contacted and an energy audit is scheduled. The energy audit determines the appropriate measure to be initiated based on the existing condition of the home and the funds available. Program resources can be used for shell measures that may include:

- Ceiling, wall, and floor insulation
- Energy-related minor home repairs
- Energy conservation education
- Air infiltration reduction
- Furnace repair and replacement
- Heating duct improvements
- Health and safety improvements

Completed work is inspected by the local agency to ensure compliance with program standards. The key performance measure (KPM) approved and reviewed by the Legislature for the ECHO program is to create at least \$1 in energy savings for every \$1 of state investment. During this time period, the ECHO program generated another \$1.04 in energy savings for every dollar invested.

Table 22 shows the PPC fund receipts and expenditures allocated for low-income home weatherization from January 1, 2013 to June 30, 2014. During this period, \$11,716,012 in PPC funds was designated for low-income weatherization. Expenditures on completed weatherization projects during the same period totaled \$11,828,592. During this reporting period, some carryover funds were spent in addition to funds that were received during this period.

**Table 22: Low-Income Weatherization (ECHO) Program Receipts and Expenditures (1/2013 – 6/2014)**

Transaction	PGE	PacifiCorp	Total
<b>Fund Receipts</b>	<b>6,862,312</b>	<b>4,853,700</b>	<b>11,716,012</b>
<b>Expenditures</b>			
Committed but unexpended	1,673,875	1,539,757	3,213,632
Expenditures	7,274,738	4,553,854	11,828,592
<b>Total Expended and Committed</b>	<b>8,948,613</b>	<b>6,093,611</b>	<b>15,042,224</b>

#### 4.4.2 Results

The low-income weatherization accomplishments are summarized in Table 23. Since the beginning of 2013, this program resulted in the weatherization of 1,599 homes with a combined estimated electricity savings of 7,394,647 kWh. These program efforts have directly benefited 3,287 people, a large portion of whom are in demographic groups that tend to include the elderly, disabled individuals and young children.

**Table 23: Low-Income Weatherization (ECHO) Program Accomplishments (1/2013 – 6/2014)**

Accomplishment	Total
<b>Number of Homes Weatherized</b>	<b>1,599</b>
<b>Annual kWh Savings</b>	<b>7,384,647</b>
<b>Total Population Served</b>	<b>3,287</b>
<b>Special Target Populations Served*</b>	
Elderly (>60 years old)	645
Children (<6 years old)	331
Handicapped	447
Farm Workers	23
Native American	169
Hispanic	1,415
African American	203
Asian	57

\*Individuals can be counted in more than one category, as such, the sum of the special target population categories is greater than total population served.

## 5 School Districts

---

### 5.1 Overview

Before HB 2960 was signed into law in June 2011, 10 percent of PPC funds were allocated to 16 Educational Service Districts (ESDs) located within PGE and PacifiCorp service territories. Since June 23, 2011, PPC funds have been distributed directly to the 112 school districts located within the utilities' service territories, and 825 schools (with 393,211 students) are eligible for PPC funding.<sup>13</sup> Any remaining balances held by the ESDs were transferred to the school districts. Since this 18-month report covers the period from January 2013 to June 2014, the utility receipt figures include funds distributed only to school districts; ESDs no longer receive funds.

These funds are used for cost-effective energy conservation projects at individual schools within each school district and must follow a specific spending directive. First, all schools within a school district must complete an energy audit to identify cost-effective conservation opportunities. After all the schools have completed the audit, PPC funds are used to pay for eligible energy efficiency measures, to cover the energy savings that will result through the estimated measure life.<sup>14</sup> Finally, when all of the recommended measures have been installed, any remaining funds may be used to pay for additional energy conservation measures, energy conservation education, and renewable energy projects at schools within the school district.

The Oregon Department of Energy provides program oversight for the school district audits and projects to ensure consistency across school districts and to verify that projects adhere to the guidelines established for this program. Although the Oregon Department of Energy has oversight for this program, the individual school districts receive their PPC funds directly from the utilities.

### 5.2 Receipts and Expenditures

Table 24 provides a summary of the ESD and school districts portion of PPC fund receipts and expenditures from January 1, 2013 through June 30, 2014. In addition to the normal program administrative expenses defined earlier, this program had additional administrative expenses for each ESD and school district until HB 2960 was enacted in June 2011. Total administrative costs for the school districts portion of the PPC funds, then, equal \$176,978 and comprise 1.1 percent of total expenditures over this period, and 1.3 percent of the PPC allocation to Oregon schools.

---

<sup>13</sup> These figures are based on the 2012-2013 school year. The 2013-2014 school year data is not yet available.

<sup>14</sup> For example, consider a measure with an installed cost of \$30,000 and a measure life of 20 years that will lead to energy savings of \$1,000 per year. The simple payback would be  $\$30,000/\$1,000 = 30$  years. The reimbursement for this measure is capped at  $(\$1,000/\text{year}) \times (20 \text{ years of life}) = \$20,000$ .

**Table 24: ESD/School Districts Receipt and Expenditure Summary (1/2013 - 6/2014)**

Transaction	PGE	PacifiCorp	Total
<b># of ESDs Receiving Funds*</b>	0	0	0*
ESD receipts (1/2013 - 6/2014)	\$0	\$0	\$0
<b># of School Districts receiving funds**</b>	42	74	112 **
School District receipts (1/2013 - 6/2014)	\$7,769,597	\$5,491,791	\$13,261,388
<b>Total Fund Receipts</b>	<b>\$7,769,597</b>	<b>\$5,491,791</b>	<b>\$13,261,388</b>
<b>Expenditures</b>			
Audits	\$308,777	\$110,776	\$419,553
Conservation Measures Installed	\$4,690,264	\$10,719,797	\$15,410,061
Commissioning Costs (after measures installed)	\$114,270	\$34,760	\$149,030
ESD and School District Administrative Expenses***			\$29,567
ODOE Administrative Expenses			\$147,411
ODOE Program Expenses			\$340,013
<b>Total Expenditures</b>	<b>\$5,113,311</b>	<b>\$10,865,333</b>	<b>\$16,495,635</b>

\* ESDs no longer receive funds. This change took place after HB 2960 passed in June 2011.

\*\* 4 school districts have overlapping utility coverage.

\*\*\* There are no longer any ESD Admin Expenses, only School District Admin Expenses.

### 5.3 Results

Among the 825 schools that are eligible for PPC funds, 772 (94 percent) have completed audits. A total of 5,931 individual energy efficiency measures have been identified in these audits that are currently eligible, and 2,563 (43 percent) of these energy efficiency measures have been implemented. To date, there has not been enough PPC funding available for school districts to implement all the measures identified in the energy audits.

Table 25 shows the results of audits completed during the January 2013 - June 2014 period. During this time, 162 audits were completed across 30 school districts. The audits identified 629 conservation measures that could be installed cost-effectively. If all of these measures were implemented, they would result in annual electricity savings of 7,300,139 kWh and natural gas savings of 758,055 therms. The measures and associated energy savings translate to \$1,319,552 in potential utility bill savings each year.

**Table 25: ESD/School Districts Audit Results (1/2013 – 6/2014)**

<b>Audit Accomplishment</b>	<b>PGE</b>	<b>PacifiCorp</b>	<b>Total</b>
<b># of Audits Completed</b>	<b>106</b>	<b>56</b>	<b>162</b>
<b># of School Districts</b>	<b>13</b>	<b>20</b>	<b>30</b>
<b># of Measures Identified*</b>	<b>408</b>	<b>221</b>	<b>629</b>
<b>Potential Savings Identified in Audits</b>			
Electricity Savings (kWh)	3,291,586	4,008,553	7,300,139
Natural Gas Savings (therms)	427,554	330,501	758,055
Other Fuels (gal)	3,155	33,374	36,529
Total Annual Energy Cost Savings (\$)	\$588,894	\$730,658	\$1,319,552
Total Savings (Btu)	54,337,673,918	53,163,756,789	107,501,430,707
<b>Total Cost of Measures Identified</b>	<b>\$13,823,262</b>	<b>\$15,025,498</b>	<b>\$28,848,760</b>

\* ODOE continually reviews the eligibility of measures, which can change over time due to facility changes or changes to estimated savings or costs.

PPC funds are also used to install measures identified through the school audits, and the accomplishments related to actual measure installations are shown in Table 26. During the reporting period, 251 measures identified during audits were installed across 26 school districts. Energy efficiency measures that are most frequently installed include: BAS/DDC systems, occupancy sensors, programmable thermostats, lighting retrofits (e.g., T12 to T8 conversions, Metal Halide to linear fluorescents), building envelope measures (e.g. insulation, efficient windows), 90% or higher efficiency condensing hot water heaters, and heating systems (e.g. high efficient boilers, heat pumps). Common operations and maintenance (O&M) measures include calibrations for HVAC and building control systems, building envelope repairs (e.g. replace/repair broken weather stripping and caulking), heating system repairs (e.g. boiler tune-ups, repair leaking steam traps), and repair leaking faucets/fixtures. In total, these measures are expected to save 4,876,315 kWh in electricity and 125,805 therms of natural gas annually. Total savings to the schools from the installation of these measures is estimated to be \$1,150,073 each year. Districts achieve these savings by leveraging the PPC funds shown below to acquire or extend other funds: state energy tax credits, federal grants, and general fund dollars (for the non-energy efficiency portion of projects or when PPC funds have been exhausted). Individual project cost reimbursements are capped based on the annual energy costs savings and the estimated measure life.

**Table 26: ESD/School Districts Efficiency Measures Installed (1/2013 – 6/2014)**

Measure Accomplishment	PGE	PacifiCorp	Total
<b># of Audit Measures Installed</b>	<b>124</b>	<b>127</b>	<b>251</b>
<b># of School Districts</b>	<b>8</b>	<b>20</b>	<b>26</b>
<b>Average Estimated Measure Life (years)*</b>	<b>16.4</b>	<b>18.1</b>	
<b>Annual Savings</b>			
Electricity Savings (kWh)	1,677,998	3,198,317	4,876,315
Natural Gas Savings (therms)	12,075	113,730	125,805
Other Fuels (gal)	145,063	193,855	338,918
Total Annual Energy Cost Savings (\$)	\$336,160	\$813,913	\$1,150,073
Total Annual Energy Savings (Btu)	28,543,192,374	49,750,732,421	78,293,924,795
<b>Total PPC Cost of Measures Installed</b>	<b>\$4,690,264</b>	<b>\$10,719,797</b>	<b>\$15,410,061</b>
<b>Commissioning Costs</b>	<b>\$114,270</b>	<b>\$34,760</b>	<b>\$149,030</b>

\* The SB1149 Schools Program went through a Program change in August 2013 that caps SB1149 project reimbursable costs at the Estimated Measure Life.

## 6 Self Direct Customers

### 6.1 Overview

Large commercial and industrial energy customers who fund their own efficiency projects (self-direct customers) can waive a portion of their public purpose charge. The Oregon Department of Energy maintains a database to help these customers individually calculate their monthly PPC responsibility. First, self-direct customers submit notice of efficiency projects to the Department of Energy for approval; projects are certified when completed and certified project amounts are recorded on customers' accounts. These "credits" can then be applied to public purpose charges on customers' utility bills. Self-direct customers who use such credits still qualify for at least 50 percent of Energy Trust incentives for other energy projects at the same site. Sixty-four large energy customers in the PGE and PacifiCorp territories are currently active in the self-direct program or have pending applications.

Note that available project credits can be carried forward month-to-month, so credits claimed do not necessarily equal project expenditures in a given period. From January 2013 through June 2014, self-direct customers in the PacifiCorp service territory claimed \$672,347 in credits for conservation and renewable resource projects, and customers in the PGE service territory claimed \$3,749,832. Combined, self-direct customers of both utilities claimed \$2,782,357 in conservation credit and \$1,639,822 in renewable resource credit from January 2013 through June 2014.

### 6.2 Results

Table 27 summarizes self-direct program conservation activity from January 2013 through June 2014. During this period, self-direction sites implemented projects that involved HVAC system improvements, boiler upgrades, lighting changes and variable frequency drives (VFDs). PGE customers certified 15 conservation projects (six in Washington County, four in Marion County, three in Multnomah County, and two in Clackamas County) with a total eligible cost of \$4,799,035. PacifiCorp customers certified four projects in Marion County with a total eligible cost of \$55,447. The combined effect of these projects is about 10.7 million kWh in energy savings annually, or \$675,824 in annual energy cost savings.

**Table 27: Self-Direct Program Certified Conservation Projects  
(1/2013 – 6/2014)**

	PGE	PacifiCorp	Total
<b>Projects Certified</b>	15	4	19
<b>Total Eligible Cost</b>	\$4,799,035	\$55,447	\$4,854,482
<b>Total Energy Cost Savings (annual)</b>	\$646,672	\$29,152	\$675,824
<b>Total Energy Savings (annual kWh)</b>	10,296,661	440,373	10,737,034

Table 28 summarizes self-direct program green tag renewable energy purchases from January 2013 through June 2014. PGE customers purchased almost 437,000 green tags valued at almost \$1.5 million, and PacifiCorp customers purchased over 94,000 green tags valued at \$716,100. The combined effect of these contracts is over 531 million kWh of renewable energy purchased annually.

The Oregon Department of Energy incurred administrative costs of \$170,588 and program expenses of \$65,842 to process all conservation, renewable energy and green tag projects.<sup>15</sup>

**Table 28: Self-Direct Program Green Tag Purchases  
(1/2013 - 6/2014)**

	PGE	PacifiCorp	Total
<b>Sites</b>	33	32	65
<b>Green Tags Purchased</b>	436,926	94,248	531,174
<b>Credits Issued</b>	\$1,480,710	\$716,100	\$2,196,810
<b>Energy Purchased (annual kWh)</b>	436,912,980	94,259,187	531,172,167

<sup>15</sup> ODOE's administrative costs for the Self Direct program were different this biennium due to two main factors: the data server was relocated to ODOE facilities to reduce long-term hosting costs, and the database software was updated to improve data security.

## 7 Summary

Table 29 summarizes the expenditures and results for PPC expenditures from January 2013 through June 2014. The agencies spent a combined total of \$114,236,107 on programs and projects completed during this period. Annual energy savings and renewable resource generation achieved from projects completed during this time reached 898,415,962 kWh (about 103 aMW), which is enough to power approximately 79,500 average-sized homes each year.<sup>16</sup> When all fuel types are included in addition to electricity, PPC expenditures resulted in annual savings of 3,127,129 million Btu.

**Table 29: Summary of PPC Expenditures and Results (1/2013 – 6/2014)**

Agency / Program	Expenditures	Results		
		kWh Saved or Generated	aMW	MMBtu
<b>Energy Trust – Conservation*</b>	\$59,775,805	317,296,789	36.22	1,082,617
<b>Energy Trust – Renewables**</b>	\$12,103,361	26,190,491	2.99	89,362
<b>School Districts***</b>	\$16,495,635	4,876,315	0.56	78,294
<b>OHCS Low-Income****</b>	\$21,202,697	8,143,166	0.93	27,786
<b>Self-Direct Customers*****</b>	\$4,658,609	541,909,201	61.86	1,849,071
<b>Total Expenditures</b>	<b>\$114,236,107</b>	<b>898,415,962</b>	<b>102.56</b>	<b>3,127,129</b>

\* Schools Projects savings of 36,237 kWh have been subtracted from the Energy Trust - Conservation to prevent double counting, since both Energy Trust and the School Districts support this effort and therefore include the savings in their reports. Energy Trust delivers additional savings to PGE and PacifiCorp through funding authorized under SB 838, and to NW Natural and Cascade Natural Gas under the terms of a stipulation with the OPUC. Energy Trust reports total savings for all expenditures to the OPUC.

\*\*Energy saved excludes savings from reduced transmission and distribution losses. Renewable energy savings are from currently operational projects.

\*\*\* MMBtu includes savings from electricity, natural gas, and other fuels.

\*\*\*\* Expenditures for the OHCS Low-Income program include expenditures from the Housing Trust Fund, which does not track energy savings for its projects.

\*\*\*\*\* Expenditures listed for Self-Direct represent public purpose charges retained and spent by the participating sites in lieu of making payments to the utilities.

<sup>16</sup> Calculated using ODOE's estimate that an average megawatt is enough to power 775 homes each year (assuming electric heat).
