

CUT HEATING COSTS DOWN TO SIZE

SAVE ENERGY AND MONEY WITH GAS HEATING EQUIPMENT UPGRADES

Energy Trust provided their expertise to help us obtain the money that made this project possible. As a result, we're on track to save \$40,000 a year on a boiler replacement project.

Dave Cone,
resource conservation manager
Evergreen School District

Natural gas efficiency improvements directly reduce your energy costs, giving you better control over operating expenses in your commercial building.

Business customers of NW Natural in Washington can improve heating system performance and reap substantial savings by working with Energy Trust of Oregon to upgrade antiquated equipment. Today's energy-efficient heating systems are a smart investment and can trim annual heating costs by up to 15 percent.

Energy savings are only the beginning

Energy-efficient heating systems benefit your business in several important ways. By delivering more uniform temperatures, new equipment can help:

- Improve occupant comfort and productivity
- Reduce maintenance costs
- Help improve the quality of indoor air
- Contribute to a more sustainable future

Earn cash incentives for energy-efficient equipment

- Boilers
- Boiler vent dampers
- HVAC unit heaters
- Radiant heating
- Steam traps
- Warm-air furnaces

Energy Trust pays cash incentives on the installation of qualifying heating systems. If our standard incentives don't work for your project, you may be eligible for custom incentives. We're here to help you reduce your energy costs.

Take control of your energy costs. To learn more, call **1.866.368.7878** or visit **www.energytrust.org/washington**.
