

# WATER HEATING GAS SAVINGS

## COMMERCIAL TANKLESS WATER HEATER < 200 kBtu/h

### OREGON BUSINESS CUSTOMERS

Tankless water heaters deliver on-demand, continuous hot water flow while avoiding the standby losses associated with standard tank water heaters. This can save energy and money, compared to water heaters with storage tanks.

Energy Trust of Oregon is now offering a \$300 incentive for the installation of new or replacement gas-condensing tankless water heaters < 200 kBtu/h. The incentive covers all qualified units up to 199,999 Btu/h for eligible Oregon business customers on qualifying rate schedules of NW Natural, Cascade Natural Gas and Avista.

Cash incentives are available for tankless water heaters in:

- Coin-operated laundries
- Restaurants and cafeterias, including those inside other buildings such as colleges, offices or hotels
- Grocery stores with foodservice areas
- Gyms/fitness and aquatic centers, including those inside other buildings such as hotels and K-12 schools, colleges and universities
- K-12 schools

EQUIPMENT	REQUIREMENTS	ESTIMATED AVERAGE SAVINGS	UNIT INCENTIVE
Commercial Tankless Water Heater < 200 kBtu/h	Gas-condensing units must function as central source for domestic hot water heating  Minimum 94% thermal efficiency  Input of < 200 kBtu/h per water heater  Additional hot water storage tanks cannot be added	Coin-operated laundries: 481 therms	\$300 each
		Restaurants and cafeterias: 152 therms	
		Grocery stores with foodservice areas: 152 therms	
		Gym/fitness and aquatic centers: 100 therms	
		K-12 schools: 89 therms	

Energy Trust has a separate cash incentive for tankless water heaters ≥ 200 kBtu/h.

Incentives are subject to funding availability and may change.

Effective for equipment purchased on or after May 15, 2018.
