Clean, affordable energy for everyone

Final Proposed 2021 Annual Budget and 2021-2022 Action Plan

December 11, 2020
Presentation Outline

- Forecasted 2020 results
- Final proposed 2021 budget
- Public comments summary
- Final Proposed 2021 Budget and Action Plan highlights
- Key takeaways
- Budget resolution
Our Ask of the Board

- Do you agree that this year’s budget and action plan supports the strategic direction of the organization you established in the 2020-2024 Strategic Plan?

- Do you agree that the approaches, tactics and initiatives in our final proposed budget and action plan are the appropriate actions for us to focus on next year to achieve our annual goals?

- Do you understand the trends we’re seeing, and do you agree we have characterized them sufficiently and are managing to them appropriately?
Projected 2020 Results

Expect to achieve >90% for all energy goals
- Exceed goal for NW Natural in Oregon
- Meet goal for Pacific Power and Avista
- Reach 90-95% for PGE and Cascade Natural Gas
- Exceed renewable generation goals for PGE and Pacific Power

Drivers
- Bonus incentives for commercial and industrial lighting and equipment
- Exceptionally strong 2021 project pipelines required immediate 2020 incentive pauses for some measures
- Biopower project and success engaging solar market

Expenditures are expected to be 94% of budget
2021 Budget Summary

▪ **Investing $206.5 million** of utility customer funds

▪ **Saving 45.0 aMW and 6.5 MMTh**

▪ **Generating 3.54 aMW**

▪ **Distributing $114.8 million in incentives**, 56% of total expenditures

▪ **Delivering highly cost-effective energy**

▪ **Administrative costs at 7.9%**

Notes:
aMW: average megawatts of electricity
MMTh: million annual therms of natural gas
Administrative costs are for Management and General, Communications and Outreach
Customer Benefits from 2021 Investments

- More access for diverse and rural communities
- Lower energy bills and energy burden for participants—$707 million in future bill savings for participants
- Opportunities for 1,900 local businesses and investments in workforce development
- Cleaner air by avoiding 4 million tons of carbon dioxide
- Local investments that keep dollars in our communities
## Summary of Changes to Final Proposed Budget

Summary of Public Comments
Draft Budget Workshop Feedback

Enthusiasm for thoughtful community engagement

One thing we all share is humanity

COVID and wildfires as a source of innovation and new partnerships

I'm excited to continue exploring how to support ratepayer communities who have lost homes and been impacted by wildfire and pandemic.

Inclusive co-creation

Better outreach includes people in the planning phase, so that there is buy in before roll out

Proactive (Energy Trust-initiated) versus responsive (community-initiated)

Early, long term involvement with resilience planning

Help communities rebuild stronger and more energy efficient and resilient

Opportunities to leverage other funding

New needs for small businesses

Energy Trust wildfire taskforce

DAC

New community engagement/outreach roles

Early engagement
Written Public Comments Summary

Formal comments received from 11 organizations (including utilities) or individuals; majority supportive of budget

Common areas of feedback

- Community outreach and collaboration
- Coordination with utilities
- Diversity, equity and inclusion
- Ratepayer and internal cost management
- Residential program
- Response to wildfires and economic recovery
- Solar program
OPUC Recommendations on the Draft Budget

1. Continue to focus on identifying and developing residential measures, particularly with greater peak impacts
2. Continue to develop peak modeling capability
3. Include measure cost-effectiveness exception costs in future budgets
4. Implement the supplier diversity tracking system
5. Develop a longer-term strategy to align staffing with outreach goals
6. Ensure administrative costs in the 2022 budget do not exceed 8% of annual revenues
Final Proposed 2021 Budget and Action Plan Highlights
2021 Organizational Goals

Meet savings and generation targets with offers and services designed to support customers during the economic and social recovery related to the COVID-19 pandemic.

Invest in relationships and collaborations with other entities to meet common needs and future objectives.

Enhance operating processes and internal culture to efficiently respond to change.

Please see complete goal statements, which include additional detail on how efforts will be focused, in the supplemental section of this presentation.
$184.7 million, up 1.8% from 2020 budget
2021 Final Proposed Budget Expenditures

$206.5 million, up 1% from 2020 budget

The budget uses net assets/reserves to cover planned expenses in excess of anticipated revenue
2021 Budget Expenses by Category

- **Incentives**
  - 2020: $113.2 million
  - 2021: $114.8 million

- **Program Delivery**
  - 2020: $58.1 million
  - 2021: $55.9 million

- **Staff costs**
  - 2020: $15.7 million
  - 2021: $16.8 million

- **Internal costs**
  - 2020: $17.5 million
  - 2021: $19.0 million
2021 Electric Savings by Program

- Savings down 1% from 2020 budget
- $144.6 million in total costs, including customer incentives, services and delivery
- Business customers opting for smaller projects or operations and maintenance
- Savings impacted by baseline changes, code changes and sources of very low-cost savings shrinking
- Savings bolstered by large pipeline of low-cost lighting and standard projects

Note: aMW: average megawatts; Comparisons are final proposed 2021 budget to 2020 budget
2021 Natural Gas Savings by Program

- Savings down 5.3% from 2020 budget
- $37.9 million in total costs, including customer incentives, services and delivery
- Business customers opting for smaller projects or operations and maintenance
- Savings impacted by baseline changes, code changes and market evaluations
- Increasing incentives to drive savings during recession

6.5 MMTh savings

**MMTh:** million annual therms

Comparisons are final proposed 2021 budget to 2020 budget
2021 Renewable Generation

- Generation up 8.4% from 2020 budget
- $23.3 million in total costs, including customer incentives, services and delivery
- Meeting higher demand for solar systems
- Expanding support for low-income customers and communities of color
- Other Renewables projects completing
  - 2 hydropower projects and 1 biopower project
- Investing in project development assistance to build pipeline

Comparisons are final proposed 2021 budget to 2020 budget
Additional Contracts

Community Solar Program
- Subcontract to Energy Solutions for program development and delivery
- Second full year of contract
- Program developed and underway
- 5-10 aMW of Community Solar Program generation expected in 2021; not Energy Trust generation

PGE Smart Battery Pilot
- Contract with PGE for outreach, quality management and upfront incentive pass through
- Launched in late 2020
- Goal of enrolling 525 qualifying smart battery systems over 5 years

$0.32M total costs

$0.45M total costs
Staffing Costs Subject to OPUC Performance Measure

- Staffing costs comply with OPUC performance measure of ≤9% year-over-year growth
- Increases due to rising health insurance costs, minimal compensation adjustments, two new diversity fellows, two new outreach staff to build relationships with underserved communities and a new solar project manager
- Chart shows costs and percent increase over prior year

*Staffing costs are embedded in internal program delivery, general communications & outreach, and management & general Figures exclude NW Natural Washington, Community Solar Program, PGE Smart Battery Pilot and Development funds*
Administrative and Program Support Costs Subject to OPUC Performance Measure

- Administrative and program support costs comply with OPUC performance measure (<8% of revenue; annual increase limited to ≤10%)
- Costs at 7.9% of annual revenue, increasing 3.4% from 2020 budget
- Chart shows costs and costs as percentage of revenue

Figures exclude NW Natural Washington, Community Solar Program, PGE Smart Battery Pilot and Development funds.
New delivery contracts and approaches

Learning through new measures, pilots, forecasting, evaluation and innovation

Increased community outreach to develop future opportunities

Working with more diverse trade allies, contractors, suppliers and organizations

Continued systems and process enhancements

Evolving as an organization through internal DEI work, staff and board support

Continued focus on cost-effectiveness and serving more rural, low income and customers of color
Areas of Diversity, Equity and Inclusion Investment

- **Community Partner Funding** to support delivery of residential offers in diverse communities
- Additional incentives and targeted marketing to support energy-saving upgrades in rentals
- Support for reduced cost LEDs in retail locations serving low-income communities
- Development of small business offers delivered by trade allies serving communities of color, low income and rural communities
- Co-funding to work with agencies on affordable, efficient multifamily housing
- Higher solar incentives for nonprofits that provide services for low income and communities of color, and for affordable multifamily buildings
- Support for Diversity Advisory Council and internal DEI committee
- Development of supplier diversity program
- DEI lead and additional staff to build relationships with communities of color
- Hiring and retention strategies for increasing staff diversity
- Formation of a board diversity, equity and inclusion committee
Wildfire Recovery and Rebuilding

Near-term engagement opportunities

- Listen, learn, engage and educate
- Team of staff to coordinate internally, assess opportunities and consider new or amended offers

Longer-term support opportunities in 2021 and 2022

- Initial cleanup could take 18 months, timelines uncertain
- Some rebuilding may occur sooner
- Deploy existing program and outreach resources
- Offer expertise and incentives for early planning and new construction design in 2021
- Rebuilding likely to begin most places in 2022
2022 Budget Projection

- Expenditures to decrease 1.5%
- Electric savings to increase 8.9%
  - Levelized costs to decrease by 3.7%; from 3.6¢/kWh to 3.5¢/kWh
- Gas savings to decrease 2%
  - Oregon levelized costs to increase by 5.9%; from 44.0¢/therm to 46.6¢/therm
  - Washington levelized costs to increase by 7.1%; from 65.5¢/therm to 70.2¢/therm
- Renewable generation to decrease 6.1%

Comparisons are final proposed 2022 budget to final proposed 2021 budget
Summary
Key Takeaways

1. Adapting to meet customers’ needs in an uncertain future, guided by our strategic plan

2. Serving communities and building relationships is key to reach energy goals

3. As forecasted, electric and gas savings declining and costs increasing; remain cost-effective for customers

4. Investments in innovation, outreach, systems and tools will pay off in future savings, generation and cost management

5. Working differently and more efficiently and equitably to operate expanding program portfolio
Questions and Discussion

▪ Do you agree that this year’s budget supports the strategic direction of the organization you established in the 2020-2024 Strategic Plan?
▪ Do you agree that the approaches, tactics and initiatives in our final proposed budget are the appropriate actions for us to focus on next year to achieve our annual goals?
▪ Do you understand the trends we’re seeing, and do you agree we have characterized them sufficiently and are managing to them appropriately?

*Staff recommends the Board of Directors adopt Resolution 926:*

Final Proposed 2021 Budget and 2021-2022 Action Plan
Thank You

Michael Colgrove
Executive Director

Figures exclude NW Natural Washington, Community Solar Program, PGE Smart Battery Pilot and Development funds.
2021 Budget Expenditures (Oregon only)

$202.4 million, up 0.4% from 2020 Oregon budget

The budget uses reserves to cover planned expenses in excess of anticipated revenue.

Figures exclude NW Natural Washington, Community Solar Program, PGE Smart Battery Pilot and Development funds.
Developing the Budget and Action Plan
Budget Outreach Schedule

October & November
- Draft budget online and public comment period open, Oct. 7
- Budget workshop, Oct. 14
- Budget workshop presentations online, Oct. 19
- Public comments due, Oct. 28
- OPUC public meeting, Nov. 12
- Review changes with advisory councils, Nov. 18

December
- Final proposed budget online, Dec. 4
- Board action on final proposed budget, Dec. 11
- Submit board-approved budget and action plan to OPUC, Dec. 31
Helping achieve Oregon’s clean energy future
2020–2024 Strategic Plan
Focus Areas

1. ENGAGING CUSTOMERS
   Engaging customers with programs, information and services, with attention to underserved customers.

2. SUPPORTING UTILITIES
   Linking to the approaches utilities are using to meet changing customer energy needs.

3. INFORMING POLICYMAKERS
   Supporting energy policies by providing objective information and analyses.

4. DELIVERING MULTIPLE BENEFITS
   Leveraging additional funding to advance clean energy investments that deliver multiple benefits.

5. ADAPTING TO CHANGE
   Enhancing our ability to respond to changes, needs and new opportunities.
Annual Target Setting

- Annual savings goals related to each utility’s Integrated Resource Plan (IRP) target
  - Staggered two-year IRP cycles
  - Energy Trust annual goals can vary from the IRP target because of new information
  - Utilities file tariffs to collect funding necessary to meet annual goal
- Generation goals informed by resource availability and market drivers
2021 Goals

Goal 1: Meet savings and generation targets with offers and services designed to support customers during the economic and social recovery related to the COVID-19 pandemic.

We will meet 2021 targets of 45.0 aMW and 6.5 million therms of savings and 3.54 aMW of generation while creating opportunities for future savings and generation with a particular focus on:

- Continuing to adapt program design to respond to market changes resulting from the recovery related to the COVID-19 pandemic.
- Meeting the OPUC metrics for cost-effectiveness, diversity, customer service and innovation.
- Targeting savings and generation within specific communities when and where they have the greatest value to the utility grid.
Goal 2: Invest in relationships and collaborations with other entities to meet common needs and future objectives.

We will focus resources on working with utilities, agencies, communities and business- and community-based organizations on joint initiatives that help each entity accomplish its purpose with a particular focus on:

- Collaborating with workforce organizations to enhance the diversity of our Trade Ally Network.
- Resolving funding uncertainties to enable continued delivery of clean energy programs and benefits and identifying other funding sources for complementary initiatives.
- Connecting our programs to community planning, housing affordability, economic recovery, resiliency and greenhouse gas reduction efforts.
- Collaborating with the Portland Clean Energy Fund and prospective grantees.
- Working with the OPUC and state agencies to support implementation of the state’s energy- and climate-related policies.
- Working with mid-stream market actors to retain our ability to deliver affordable, clean energy at volume.
Goal 3: Enhance operating processes and internal culture to efficiently respond to change.

We will enhance operating efficiency through process improvements and continued investment in innovation that results in a flexible workforce and work environment with a particular focus on:

• Enhancing employee development and growth with an emphasis on intercultural awareness and inclusion.
• Improving the efficiency of our budget process.
• Continuing policy development and technology adoption to support remote work arrangements and social distancing for staff.
• Learning from experience and adapting our organizational structure to support progress in the focus areas identified in the strategic plan.
• Furthering our efforts to foster and promote innovation.
• Accelerating our use of digital platforms and increased process automation to enhance our customer and contractor experience through increased efficiency.
Building Our Budget and Action Plan

1. 2020-2024 Strategic Plan focus areas and strategies
2. Energy efficiency and renewable energy resource planning
3. Business planning, prioritization and goal setting
4. Market knowledge and context
Context Shaping the Budget

Oregon Employment by Wage
Percent Change Since January 2020, Terciles Based on Industry Average Wage
- High (> $62k)
- Middle ($40-62k)
- Low (< $40k)

Urban-Rural Employment in Oregon
Employment Change from Pre-Great Recession Peak

Source: Oregon Employment Department, Oregon Office of Economic Analysis
Latest data: July 2020 | Source: Oregon Employment Department, Oregon Office of Economic Analysis
Context Shaping the Budget

COVID-19, recession reshape savings and generation opportunities

- Pandemic-related supply chain disruptions, combined with trade conflicts, equipment costs and tariffs, create price volatility
- Slowdown of new construction and upgrade projects; projects in progress delayed
- Viability of business models and design/location of buildings uncertain

- 30-60% increase in air freight costs
- 84% of multifamily construction companies expect project delays
- 12% Portland Metro office vacancy rate
Context Shaping the Budget

Pandemic, natural disasters and recession change customer needs

- Businesses interested in lower-cost equipment, Strategic Energy Management; few capital projects
- More interest in equipment that improves air quality
- Higher energy burdens; more interest in low- and no-cost residential solutions
- Wildfire devastated communities have an urgent need to rebuild, esp. housing

3,124 residences destroyed by wildfires

1,400 other structures destroyed by wildfires
Context Shaping the Budget

Savings influenced by codes, standards, market transformation, evaluations

- Energy efficiency baselines increasing due to federal equipment standards and state building codes, resulting in fewer savings
- Low-cost LED savings opportunities limited by market transformation, with continued opportunities for low-income and rural customers
- Evaluations indicate very few savings opportunities for water-savings devices; showerheads and faucet aerators discontinued in most markets
- Interest in peak load management continues to grow
Context Shaping the Budget

Communities emerge as both customers and partners in reaching residents and businesses

- Cities, counties and local organizations seeking help to achieve energy and climate goals
- Community-based organizations interested in working as program delivery partners
- Stakeholder and customer feedback urges investments in building relationships with communities of color
