

# **Energy Trust of Oregon**

## **Request for Proposals:**

### **Impact Evaluation of the 2024 Existing Buildings Program**

## **Responses to Questions**

**February 26, 2025**

1. *Question: Do SEM projects typically use an Energy Performance Platform to report savings?*

Answer: As referenced in the RFP, all SEM participants use an online Performance Tracking Tool Platform (PTTP) to engage with customers, model, and claim savings. Due to privacy considerations, Energy Trust cannot provide additional details on the nature of the PTTP until after a contract is awarded.

2. *Question: What is the distribution between modeled and bottom-up savings for SEM?*

Answer: All SEM participants in the 2024 program year claimed savings using a modeled approach.

3. *Question: May we have the number of capital projects completed at SEM sites by measure type?*

Answer: Please see Table 1 below for more information on capital measures installed at SEM sites during the 2024 program year.
